

SportsQuest: At 1.7 million square feet, SportsQuest is the largest synthetic turf installation in the world.

SportsQuest, a 250-acre sports and family entertainment complex in Midlothian, VA, unveiled its new Shaw Sportexe fields to the public in 2010. With a total installation of 1.7 million square feet of Shaw Sportexe turf, the new campus features 17 sports fields, a one acre lawn and 40,000 square feet of warm-up area. The

fields are used for various sports including soccer, lacrosse, football and field hockey. The campus will support recreational, youth development, and high performance programming in 30 sports.

"We knew that a project of this magnitude would be a huge undertaking. Shaw Sportexe has far exceeded our expectations in all regards. They have done a tremendous job with the installation and we are very pleased with the Shaw Sportexe turf system chosen. The fields look fantastic and performance-wise, we look forward to our programs having a consistent and safe surface for years to come. The service and support we have received from Shaw Sportexe has been tremendous, we couldn't be happier."

-Steve Burton, CEO
SportsQuest

FACILITY PROFILE

Sports Complexes

Field Name Virginia Beach Sportsplex
Location Virginia Beach, VA
Completed August 2009
Turf Size 116,000 SQ. FT.
Product PowerBlade® HP

"The Hampton Roads Soccer Complex is a non-profit facility that serves three separate soccer clubs in Virginia Beach, VA. When it was decided to provide two synthetic turf fields for matches and training, it was extremely important to make sure we were fiscally responsible and provided a reliable product for the clubs. We found all of that by working with Shaw Sportexe. The installed fields were finished ahead of schedule, exactly as contracted, and played great! The best addition has been the ability to offer almost unlimited training throughout the year. Working with Shaw Sportexe, and especially Ronnie Pascale, was one of the best experiences in our 15 years of operations."
